ABOUT US

At Green Engineering Technologies, we combine cutting-edge technology, skilled craftsmanship, and unwavering commitment to quality to deliver world-class engineering solutions. Since our inception in 2018, we have grown into a trusted name in transformer fabrication, laser cutting and CNC bending serving industries across India and beyond.

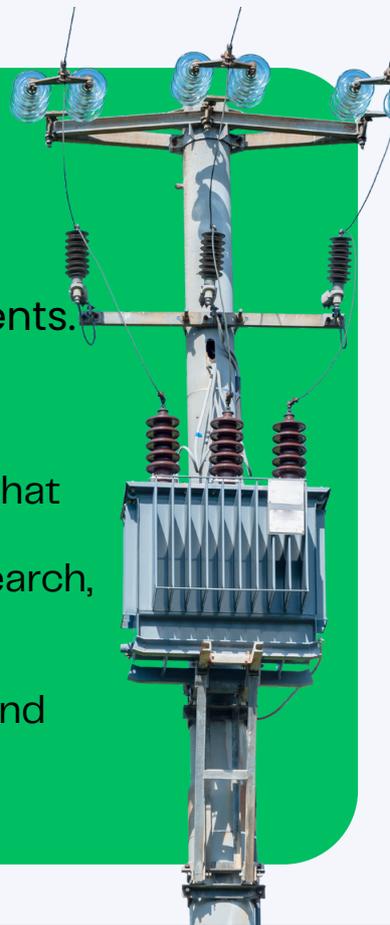

Our Vision

To become a global leader in sustainable engineering solutions by continuously innovating and implementing technologies that reduce environmental impact while delivering exceptional performance and value to our clients.

Our Mission

- To design and deliver eco-friendly engineering solutions that meet the world's growing sustainability demands
- To push the boundaries of green technology through research, innovation, and precision engineering

With our expertise in custom fabrication, renewable energy, and waste management solutions, we are building a greener tomorrow - one innovation at a time.

OUR SERVICES

At **Green Engineering Technologies**, we offer a complete range of engineering and fabrication solutions tailored to your building and industrial needs.

Transformer Fabrication

Range: 10KVA to 40MVA

Components Manufactured:

- Radiators
- Core clamping structures
- Tank bodies & conservators
- Terminal bushings & cable boxes

Custom Fabrication & Jobwork

We undertake precision metal fabrication using MS and SS for industrial structures, transformer, machine frames, panels, elevator cabins, and more—based on your drawings or specific requirements.

Lift Part Manufacturing

We manufacture high-quality lift components such as car frames, doors, cabins, guide brackets, and other critical mechanical parts—engineered for strength and durability.

Lift Installation

Professional installation of passenger, goods, hydraulic, and home elevators—ensuring safety, performance, and compliance with standards.

OUR ELEVATORS

Our elevators are built with advanced engineering, designed for smooth operation, energy efficiency, and user safety. We offer customized solutions to match your building's architecture and purpose.

Passenger & Residential Lifts

Goods Lifts

Hospital Lifts

Hydraulic & Structure Lifts

PRECISION PARTS & COMPONENTS

To ensure the flawless functioning of lift systems, we manufacture a wide range of essential components using top-grade materials and cutting-edge fabrication processes.

OUR GALLERY

A large industrial electrical transformer is shown in an outdoor setting. The transformer is a grey, cylindrical unit with two large cooling fans on its side. It is mounted on a concrete base. Above the transformer, there are several high-voltage insulators and red cables. The background shows a clear blue sky and some distant hills. The text "PRECISION IN EVERY PART. PASSION IN EVERY PROJECT." is overlaid on the bottom left of the image.

CNC BENDING & LASER CUTTING

We offer high-precision CNC bending and laser cutting services to meet industrial and commercial fabrication needs.

CNC LASER CUTTING

CNC BENDING

WHY CHOOSE US?

- ✓ **Precision Engineering** – Tight tolerances and meticulous attention to detail.
- ✓ **Customized Solutions** – Tailored to your building's unique needs.
- ✓ **Full Lifecycle Support** – From installation to service and parts replacement.
- ✓ **Trusted Quality** – Proven in residential, commercial, and industrial projects.
